

GILDA AND HENRY BLOCK SCHOOL OF THE ARTS

**Photo Editing for Absolute Beginner**

**Instructor: Stephen Sherman** [ssherman@92ny.org](mailto:ssherman@92ny.org)

In this three-session class we will discuss options for editing your digital images on a computer, primarily focusing on the organizing, and editing power of Adobe's Photographers Package, which includes Lightroom, Photoshop and Bridge. We will discuss the differences between the programs, basic organizing and editing in each program, and when to use one or the other or both. We will also discuss how to start creating an effective digital editing workflow.

Students should have a subscription to the Adobe Photographers plan and have it installed on their computers at the start of classes. It is available online from Adobe and should be \$9.99 per month
